

Microsoft Power BI Web And DAX Programming (Paperback)

Filesize: 1.33 MB

Reviews

This book is definitely not straightforward to get started on studying but extremely exciting to read. It is really simplistic but shocks in the 50 percent of the ebook. Once you begin to read the book, it is extremely difficult to leave it before concluding.
(Ally Reichel)

MICROSOFT POWER BI WEB AND DAX PROGRAMMING (PAPERBACK)

Independently Published, United States, 2018. Paperback. Condition: New. Language: English. Brand new Book. This workbook will cover the features of Power BI Web Service (Power BI Pro) which is a web-based tool that provides cloud services over the Internet to post and view Reports and Dashboards. Individual Visual Reports (Charts) are created using the Power BI Desktop tool which is installed on your local computer. Once you develop Visual Reports in Power BI Desktop, then you can publish these Visual Reports to build Dashboards in the Power BI Web Service. These tools work together to describe your data sources. The DAX program language is built into Power BI to customize information and create a unique result. DAX is similar to Excel formulas, but also has some SQL database elements. The following topics will be covered: Overview - First, an overview of the interface and the menu system will be provided. This will enable users to switch between the different modules (described below) in order to develop a Dashboard. You can create an App which is a custom interface that contains a specific set of charts and graphs to communicate your message. Dataset - This is used to store the uploaded database to the Power BI Web Service and we will demonstrate how to create new Visual Reports (Charts) from the Dataset. The Dataset can be automatically refreshed on a scheduled basis which will also update your Visual Reports and Dashboards. Report Workspace - This will display the Visual Reports created in Power BI Desktop as well as those created from the Dataset in the Power BI Web Service tool. These include Clustered Column Charts, Pie Charts, Cards to display total values, Tables of Summarized data, Matrix reports, Maps, etc. Dashboard - This is the layout of different types of Visual Reports arranged...
