Internet and Java Programming: Concepts and Applications

By Neha Ramanandi

Global Vision Publishing House, 2012. Hardcover. Condition: New. This book explains the various features of Java in a simple and systematic manner. Programming concepts and tools are explained in detail with the help of several illustrative programs. All programs given in the book have been tested. Important features like multi-threading, file-handling, applets and graphics are suitably highlighted. The more advanced features like networking, swing, RMI servlets and beans have also been thoroughly explained. The book would serve as an extremely useful text for MCA, M.Sc. (Computer Science), PGDCA and B.Tech. (Information Technology and Computer Science) students. DOEACC (O and A levels) candidates as well as practicing programmers would also find this book to be a valuable reference source. Contents ACKNOWLEDGEMENT (vii) PREFACE (ix) 1. THE INTERNET 1 2.
